## What are the astrological purposes of Rudraksha ?

In a horoscope of a native, there are 9 main planets. Each planet has its own nature and character. There are 12 houses in the horoscope. The snapshot of

the situation of these 9 planets in 12 houses (at the time of birth of the native) is called a Horoscope. 12 houses of the horoscope represent different aspects of the life of the native. These houses contain different numbers from 1 to 12. These numbers represents different Signs (e.g. 1 represent Aries, 5 represents Leo and 12 represent Pisces). Each sign has the lordship of particular planet (e.g. Aries, Leo and Pisces are under the Lordship of planet Mars, Sun and Jupiter respectively). Now, in astrology some planets are friends to each other, some planets are enemies to each other and some planets are average to each other. When a planet is situated in the sign of his friend planet, he use to give good results related to that house and if a planet is situated in the sign of his enemy planet, he use to cause tribulations related to that house. In general, astrologers use to suggest gems to the native to overcome the tribulations caused by the malefic planets or to enhance the positive results given by the benefic planet. But it is often seen, that a particular gem doesn't suit the native and starts giving tribulations. But as the Rudrakshas are believed to be always beneficial, it can be used for both kinds of planets, may it be benefic or malefic.
